

Cardiovascular Symposium: Updates in Prevention, Diagnosis, and Management

The George Washington University (GW) Heart and Vascular Institute invites you to the [6th Annual Cardiovascular Symposium: Updates in Prevention, Diagnosis, and Management](#) on **September 24, 2022**. This year's symposium will be a hybrid (in-person and virtual) event. The symposium will be hosted in person on GW's campus and via Zoom (virtual participation instructions will be sent to all registered attendees before the symposium).

This symposium is designed for clinicians involved in multidisciplinary cardiology care, including, but not limited to, cardiologists, internal medicine physicians, nurses, physician assistants, and other healthcare professionals. Learning objectives include:

- Discover which strategy is most helpful to patients with valvular heart disease
- Incorporate latest guidelines in practice
- Understand how to recognize and manage shock
- Recognize the need for defibrillation in patients with heart failure
- Learn strategies to cope with upcoming healthcare challenges and improve outcomes
- Utilize latest breakthroughs and advancement in hypertension and lipid management

An agenda can be found here: [6th Annual Cardiovascular Symposium_1 .pdf](#).
